

## How to connect the Xbox One series 2 controller with Magic-S Pro on Switch ?

a ) Please be sure to upgrade Magic-S Pro to the newest version

b ) Please turn on the “Pro Controller Wired Communication” of the Nintendo Switch system once you switch the adapter to the Switch Pro mode (the LED indicator is purple).

Tips: System Settings - Controllers and Sensors - Pro Controller Wired Communication – ON

c ) Sync Xbox One Elite series 2 controller with Magic-S Pro

1 ) Plug Magic-S Pro to Switch Dock and setup to Purple Mode for Magic-S Pro.

2) Press and hold the SYNC button located on the side of the Magic-S Pro for 3-5 seconds to make it blink quickly.

3 ) Press the button "Xbox"

4 ) Press the button "SYNC"

5 ) Sync successfully then !

6 )Please press the Home button ( Xbox Button )of the Xbox One Elite series 2 controller once it connects to Magic-S Pro .

You are ready to play games !

Special Remarks:

- It may take a longer time to connect your Xbox Elite 2 and Magic-S adapter. And the connection may be disconnected shortly (The lights on the controller and the adapter flash) and then connect again during the Bluetooth pairing process. Please wait patiently until

the LED indicators on the controller and the adapter stop flashing.

- If you want to disconnect the controller and the adapter, please press and hold the HOME button on your controller to shut off the power.

- If the Bluetooth connection failed, you can repeat the above steps to try again. Please make sure you pull out the adapter and plug it to the system again, and restart your controller before a new connection.
